Contents Volume 33 (1992, 1993)

Research papers

Modelling stability and surging in accumulation slides
R.O. Davis (Christchurch, New Zealand) 1

Evaluation of connectivity characteristics of naturally jointed rock masses
X. Zhang, R.M. Harkness (Southampton, UK) and N.C. Last (Sunbury, UK) 11

The influence of geological factors on the mechanical properties of basic igneous rocks used as road surface aggregates
B. Brattli (Trondheim, Norway) 31

Intensity versus ground motion: A new approach using Italian data
C. Margottini, D. Molin and L. Serva (Roma, Italy) 45

The Valpola landslide
A. Azzoni (Bergamo, Italy), S. Chiesa (Milano, Italy), A. Frassoni (Bergamo, Italy) and M. Govi (Torino, Italy) 59

Physical properties and indirect estimation of microfractures using Nigerian carbonate rocks as examples
A. Edet (Tübingen, Germany) 71

Book reviews

Foundation on Rock, by D.C. Wyllie — P. Antoine 81

Announcements 83

Research Papers

Preliminary seafloor subsidence values measured over the Phalen Mine 1 West panel, Sydney coalfield, Nova Scotia
T.R.C. Aston (Ottowa, Ont., Canada), A. Lapierre and J.McG. Stewart (Halifax, N.S., Canada) 85

Space–time distribution patterns of destructive earthquakes in the inner belt of Central Japan (Part 3): Seismic hazard assessment
Y. Kanaori, S.-i. Kawakami and K. Yairi (Gifu City, Japan) 99

Response of sabkha to laboratory tests: A case study
O.S.B. Al-Amoudi, S.N. Abduljauwad, Z.R. El-Naggar and Rasheeduzzafar (Dhahran, Saudi Arabia) 111

Applicability of blast casting technique in strip-mining phosphate rock
S.A. Taqieddin (Irbid, Jordan) 127

Short Note

Resistivity identification of shallow mining cavities in Real del Monte, Mexico
R.C. Ramiro and R.G. Raymundo (Mexico City, Mexico) 141

Opinion Section

The utility of conductivity surveying and resistivity sounding in evaluating sand and gravel deposits and mapping drift sequences in northeast Scotland, by C.A. Auton
Discussion
D.C. Nobes (Christchurch, New Zealand) 151
Reply
C.A. Auton (Edinburgh, UK) 152

Book Review

Handbook on the Design of Tips and Related Structures, by G.W. Practice — I.W. Farmer 155

Announcement 157

Research Papers

Four-dimensional analysis of fracture arrays at the Äspö hard rock laboratory, SE Sweden
R. Munier (Uppsala, Sweden) 159

Rock fracture-toughness determination by the Brazilian test
H. Guo (Newman, W.A., Australia), N.I. Aziz and L.C. Schmidt (Wollongong, N.S.W., Australia) 177

Une méthode indirecte de quantification de l'évolution de la microfissuration thermique dans des roches carbonatées
J-P. Troalen (Nancy Cedex, France) 189

Shallow seismic reflection in a mine gallery
M. Frappa and C. Molinier (Talence Cedex, France) 201
Engineering behaviour of phyllites
T. Ramamurthy, G. Venkatappa Rao and J. Singh (New Delhi, India) 209
Prediction of subsidence in the Indo-gangetic basin carried by groundwater withdrawal
S.K. Mishra, R.P. Singh and S. Chandra (Kanpur, India) 227
Prediction of rock and gas outburst occurrence
T. Cyrul (Krakow, Poland) 241

Book Review
Writing Successfully in Science, by Maeve O'Connor — Patrick Arthur Hill (Cork, Ireland) 251

Announcements 253

Research Papers
Introduction to the Third Richard H. Jahns Distinguished Lecture in Engineering Geology
G.A. Kiersch (Ithaca, NY, USA) 255
Earthquake probability in engineering — Part 1: The use and misuse of expert opinion. The Third Richard H. Jahns Distinguished Lecture in Engineering Geology
E.L. Krinitzsky (Vicksburg, Miss., USA) 257
Space–time correlations between inland earthquakes in central Japan and great offshore earthquakes along the Nankai trough: Implication for destructive earthquake prediction
Y. Kanaori, S.-i. Kawakami and K. Yairi (Gifu City, Japan) 289
A statistical approach to evaluate debris avalanche activity in central Virginia
K. Auer (Tigard, Oreg., USA) and A. Shakoor (Kent, Ohio, USA) 305

Book Reviews
Mining in the Arctic, edited by S. Bandopadhyay and M. G. Nelson 323

Announcements 325
